## **DETAILED ACTION**

### ***Claim Objections***

1. Claims 4-11 are objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim cannot depend from any other multiple dependent claim. See MPEP § 608.01(n). Accordingly, the claims have not been further treated on the merits.

### ***Claim Rejections - 35 USC § 112***

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:  
  
The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
3. Claims 1-3 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
4. Claims 1-3 provide for the use of an aqueous polymer dispersion, but, since the claims do not set forth any steps involved in the method/process, it is unclear what method/process applicant is intending to encompass. A claim is indefinite where it merely recites a use without any active, positive steps delimiting how this use is actually practiced.

5. Further, the term "**obtainable**" in claim 1 also renders the claims indefinite because (1) it is unclear whether the process limitation following the term is part of the claimed invention or simply exemplary of numerous potential methods for obtaining the claimed invention, (2) it is unclear whether the polymer is necessarily obtained by the process recited in the claims, and (3) the scope of the claim is unascertainable since it brings into question whether applicant is requiring the polymer necessarily obtained from the process or simply any polymer, which may not be obtained from the process.

***Claim Rejections - 35 USC § 101***

6. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

7. Claims 1-3 are rejected under 35 U.S.C. 101 because the claimed recitation of a use, without setting forth any steps involved in the process, results in an improper definition of a process, i.e., results in a claim which is not a proper process claim under 35 U.S.C. 101. See for example *Ex parte Dunki*, 153 USPQ 678 (Bd.App. 1967) and *Clinical Products, Ltd. v. Brenner*, 255 F. Supp. 131, 149 USPQ 475 (D.D.C. 1966).

8. The claims are currently unsearchable for reasons stated above, so no prior art determination is possible. However, based on the search report submitted by applicant, it appears that WO 200127163 A1 (the English translation of which is US 6841608 B1) and US 6262159 B1 may be of particular relevance to applicant's invention.
